EXPERIENCE

Biz2Credit

Software Engineer (Angular, Node JS)

📅 July-2022 - Present

📍 Noida

- Collaborated with a cross-functional team to debug critical system errors and increase system efficiency and reliability.
- Developed common libraries, modules, components and services and implemented a new Angular-based Admin dashboard for a client.
- Develop 3 custom general-use modules and components that build upon the core Angular elements and modules to achieve exceptional outcomes.
- Collaborated with the back-end development team to build a RESTful API, improving the application's overall performance and reducing load times by 30%.

HFCL Group

Senior Engineer (Angular)

📅 October-2021 - June-2022

📍 Bangalore

- Developed and implemented a new Angular-based cloud application to manage different network elements.
- Improved application performance by 25% through code optimization and refactoring and resolved critical bugs.
- Integrated third-party libraries to enhance the graphical view in the dashboard.
- Provide guidance and mentorship to junior developers to help them improve their skills and become more effective software developers.
- Updated the existing application with new features of Angular 14.

V-Labs Private Limited

Software Engineer (Angular, Node JS)

📅 Nov-2019 - May-2021

📍 Bangalore

- Developed and implemented an AI web-based dashboard and a RESTful API using Node JS, MongoDB and integrated it with an Angular application for a client.
- Designed front-end code using HTML5, CSS3, SASS, Bootstrap 4 and Angular to create a responsive web application that works across desktops, tablets, mobiles and other devices.
- Worked with cross-functional teams to develop and execute on-time and on-budget projects and initiatives.
- Developed a real-time web application that tracks the multiple-object.
- Identify and resolve software bugs and errors to ensure that applications function properly.
- Designed SPAs (Single Page Applications) using Angular concepts of Directives, Services, Promises, templating, Scope, dependency injection and Two-way data binding.

EDUCATION

Masters of Computer Application

Tezpur University

📅 2016 - 2019

📍 Tezpur, Assam

Bachelor of Computer Application

Pratap University

📅 2012 - 2015

📍 Kanpur Nagar

TECHNICAL SKILLS

- **Web Technologies:** Angular, Node.js, Express.js, MongoDB, Bootstrap 4,5, HTML5, CSS3, NgRx, Chart JS, jQuery.
- **Tools:** Visual Studio, Postman, Github, Jira
- **Languages:** C, Javascript (ES6+), HTML
- **Operating systems:** Unix, Linux, Windows
- **Interests:** Full Stack Web Development, AWS

ACHIEVEMENTS

- Awarded at **Biz2Credit** for outstanding performance project deliveries.
- Ranked under the top **50** out of 1000+ contributors all across India in the Tezpur MCA entrance exam.

PROJECTS

EduKlarity

- We are managing the session and have also booked it for a particular person at a definite time. To use this application, a person needs to pay first, and then he or she can take the live sessions of eminent personalities in the fields of art, engineers, scientists, research scholars, etc.

Perimeter Watch System

- Developed an AI-based web application used for tracking objects within a particular area. Objects can be humans, animals, birds, etc.

Temperature Monitoring System

- This project is used to check the temperature of a person. After enrolling a person, it will show the temperature with user details.

Credit Bench

- The highlight of the project was the development of an efficient and user-friendly online loan application. We strive to create a seamless experience for borrowers, ensuring that the application process takes no more than four minutes to complete.
